Objectives

Unilever currently holds a market share of 71%, equivalent to annual revenues in Vietnam; thus it has been the dream workplace for many young employees in Vietnam. Joining this programme, I aim to seek an internship opportunity with Unilever's CD Fresh to gain valuable insights about management skills, while contributing to the company's success through dedication and a strong work ethic. Additionally, I aspire to work with the marketing and product development department of Dove. I have noticed that the brand has successfully created a highly diverse product portfolio along with a unique marketing strategy that has left a lasting impression, often garnering media attention.
